TUMBLER RIDGE MUSEUM FOUNDATION
SUMMER EDUCATIONAL PROGRAMMING IN TUMBLER RIDGE, BRITISH COLUMBIA

The Tumbler Ridge Museum Foundation is offering **two positions** for the 2014 Summer Educational Programming: one **Summer Education Camp Coordinator** and one **Summer Natural History Tour Coordinator**. Both positions are based in the Peace Region Palaeontology Research Centre, the centre for palaeontology activities in British Columbia. Both positions are great opportunities for undergraduate students to develop working **science and educational outreach skills**.

Program Duration: May 01 – August 29, 2014
Program Location: Tumbler Ridge, British Columbia.

SUMMER EDUCATION CAMP COORDINATOR

The Education Camp Coordinator is responsible for the development and delivery of educational activities for children aged 6-13, as well as for K-12 school groups. There are two Educational Activity themes: Dinosaur Camps and Northern Ecosystems Camps. These objectives include:

- Familiarizing oneself with local palaeontology and ecosystems,
- Development and delivery of activities and games related to the themes for both camps,
- Leading children on field trips to fossil localities and on nature hikes,
- Leading classroom activities such as mini-lectures, fossil casting and painting, fossil and modern specimen collection techniques, and museum related activities.

SUMMER NATURAL HISTORY TOUR COORDINATOR

The Natural History Tour Coordinator is responsible for delivering educational tours to the two public-accessible dinosaur footprint localities. The tours are popular with all age groups, including school and international tour groups. Educational tours are also led to local nature areas, including birding hot-spots. Objectives include:

- Taking tour groups to dinosaur site destinations near Tumbler Ridge,
- Providing accurate, informative and engaging facts about the trails and tour destinations,
- Providing information to visitors on museum education, tour and outreach programs,
- Having a strong role in developing public outreach activities.

Successful candidates will**:**

- Learning and orally transmitting knowledge of natural history and prehistory of the Peace Region,
- Possess a valid driver's license,
- Have completed at least 2 semesters by May of an undergraduate program in the Sciences, including **Palaeontology**, **Biology**, **Geology**/**Earth & Atmospheric Sciences**, **Ecology**, etc.,
- Archaeology, Possess (or willing to acquire) up-to-date Emergency First Aid certificate,
- Be physically fit (hiking, active kids games),
- Have good oral skills and be able to talk to groups,
- Be energetic and enthusiastic,
- Be willing to submit to a criminal background check
